

BRINGING HORSES TO RENDEZVOUS 2025

Stalls are \$15 a night, in the light horse barn, uncovered corrals (over by the Western Village) are \$10 a night, you do need to bring whatever bedding you want for your horses, typically shavings.

You need to clean stalls and strip them when you leave, they do provide 2 wheelbarrows and a dump spot. If it is not too much you may want to bring a wheelbarrow as we do have several horses coming to Rendezvous.

Water is available behind the Draft horse barn; a hose will be run from the maintenance shop.

I would bring a cart to help move tack and feed around the barns, one of those fold up wagons would work well.

If you bring a chain and padlock you can secure a stall for tack and feed at no extra charge.

I have included a map of the fairgrounds, horse trailers come in from 5th Ave. On the KVEC map I drew a dark line with arrows where you will unload your horse, food, and tack in the light horse barn. Pull up next to the barns to get your horse(s), tack and food unloaded. Try to be as quick as you can as there are several horses at Rendezvous this year. Follow the arrows around to the trailer drop off area at 8th and Maple. I drove the route today and I am confident I can get my dually and 37-foot LQ through there. It is not wide open, but it is not too difficult to negotiate.

If you are coming from out of the area, get off I-90 on Exit 109 Canyon Road and head north into town. Stay in the left lane on Canyon (the right lane ends before your turn) and take a right on E. Mountain View; the Super One Foods is on your right. A few blocks down take a left on Chestnut Ave. (it is the last traffic light). Continue Chestnut, there are a couple of 4 way stops, continue to 5th Ave, there is a sign that says Fairgrounds Exhibitor's entrance, take a right on 5th and follow the map and my directions above to the barns to unload then continue to drop your horse trailer, if you are not camping in it.

Please give me a call if you have any questions, Teri Starke 253-709-5052
